DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to transponder comprising an electrical circuit, classified in class 361, subclass 760.
- II. Claims 16-28, drawn to method of manufacturing a transponder, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case a method of manufacturing a transponder can be used any chemicals or adhesives instead of feeding the thermal-plastic resin in molten form.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Edward P. Walker (Reg. No. 31,450) on June 27, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

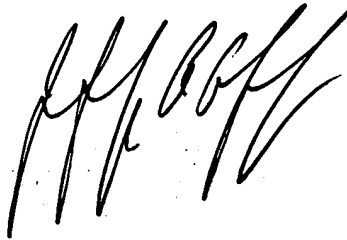

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T Dinh whose telephone number is 703-306-5856. The examiner can normally be reached on M-F.
